

SGLang Evolution Brief

Official-release evolution through 2026-09-11 · latest stable: v0.5.19

One-line conclusion

SGLang evolved through release-documented engine, scheduling, model-support, and distributed-serving changes. This brief only summarizes official-source evidence.

Release evolution timeline

Stage	Representative releases	Architectural transition
Runtime foundation	v0.1.5 – v0.1.20	OpenAI-compatible serving
High-performance engine	v0.2.0 – v0.3.6	Chunked Prefill
DeepSeek and distributed serving	v0.4.0 – v0.4.10	DeepSeek V3/R1 optimization
Platform and hybrid models	v0.5.1 – v0.5.9	HiCache
Production architectures	v0.5.10 – v0.5.19	Elastic EP

Engine path · scale path · model path

Engine: release-documented execution, compilation, and kernel changes. Scale: release-documented parallelism and disaggregation changes. Models: release-documented dense, MoE, multimodal, speech, and hybrid-model support. Consult configured official documentation for current architecture details.

Key version milestones

Date	Release	Official source
2024-01-18	v0.1.5	https://github.com/sgl-project/sglang/releases/tag/v0.1.5
2024-05-14	v0.1.16	https://github.com/sgl-project/sglang/releases/tag/v0.1.16
2024-07-26	v0.2.5	https://github.com/sgl-project/sglang/releases/tag/v0.2.5
2024-10-02	v0.3.2	https://github.com/sgl-project/sglang/releases/tag/v0.3.2
2025-03-13	v0.4.4	https://github.com/sgl-project/sglang/releases/tag/v0.4.4
2025-07-31	v0.4.10	https://github.com/sgl-project/sglang/releases/tag/v0.4.10
2025-11-06	v0.5.5	https://github.com/sgl-project/sglang/releases/tag/v0.5.5
2026-02-24	v0.5.9	https://github.com/sgl-project/sglang/releases/tag/v0.5.9
2026-06-26	v0.5.14	https://github.com/sgl-project/sglang/releases/tag/v0.5.14
2026-09-05	v0.5.19	https://github.com/sgl-project/sglang/releases/tag/v0.5.19

Deployment takeaways

Why SGLang: release-documented serving and scaling evolution. What to manage: version cadence, model/hardware compatibility, cache and parallel settings, and migration notes for defaults/deprecations.

Sources: official GitHub Releases and configured official documentation. Cutoff 2026-09-11; source mode cache.
